DETAILED ACTION

Withdrawal of Allowability

The indicated allowability of claims 35-58 is withdrawn in view of the newly discovered reference(s) to Bar-Shalom (WO 90/07311 A1). Rejections based on the newly cited reference(s) follow.

Claim Rejections - 35 USC § 112

The following is a quotation of the first paragraph of 35 U.S.C. § 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

The following is a quotation of the second paragraph of 35 U.S.C. § 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 35-58 are rejected under 35 U.S.C. § 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention.

Claim 35 includes the limitations "recess", "recess defining means", "stoma covering means" and "means for defining said recess". These limitations are not present in the specification of the instant application.

Claims 36-58 are rejected because they depend from claim 35 and thus lack enablement for the above described limitations.

Claim 46 is rejected under 35 U.S.C. § 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 46 provides for the use of the device of claim 35 for use with a pressure limiting means, but, since the claim does not set forth any steps involved in the method/process, it is unclear what method/process applicant is intending to encompass. A claim is indefinite where it merely recites a use without any active, positive steps delimiting how this use is actually practiced.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. § 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 35-39, 41, 44 and 46-56 are rejected under 35 U.S.C. § 102(b) as being anticipated by Bar-Shalom (WO 90/07311 A1).

Regarding claim 35, Bar-Shalom teaches an ostomy device capable of sealing a stoma said device comprising recess defining means (16); means (10, 11) for securing said recess defining means (16) to the body (12) proximate the stoma (13); and stoma covering means (10, 11, 14), situated externally to the body (12), over the stoma, within said recess defining means (16), said recess defining means (16) defining, with said stoma covering means (10, 11, 14), a

Application/Control Number: 10/811,055

Art Unit: 3761

recess (area under stoma defining means (16)) capable of being pressurized to press said stoma covering means (10, 11, 14) against the stoma (13)(see figure 2, infra).

Regarding the functional limitations, apparatus claims must be structurally distinguishable from the prior art. MPEP § 2114. If the prior art discloses structure that can function according to the limitations of the claims, then the prior art meets the claims.

Regarding claim 36, Bar-Shalom teaches the stoma covering means (10, 11, 14) comprises a flexible member (14).

Regarding claim 37, Bar-Shalom teaches a stoma covering means (10, 11, 14) having an upper edge fixed to the interior of said recess-defining means (16)(see figure 2).

Regarding claim 38, Bar-Shalom teaches a means (16, 19) for pressurizing the recess.

Regarding claim 39, figure 3, infra shows an open configuration of the device where fluid (atmospheric air) is permitted to enter the recess.

Application/Control Number: 10/811,055

Art Unit: 3761

Regarding claim 41, Bar-Shalom teaches a that the recess defining means is a pump means (it can be moved back and forth in a reciprocating manner, it can be pressed against receptacle (14) to increase the internal pressure thereof.

Regarding claims 44 and 46, Bar-Shalom teaches a means (15) for applying and/or limiting external pressure on the stoma (it can be pressed into place by hand, and pressure placed thereupon can be limited by hand.

Regarding claims 47 and 48, Bar-Shalom teaches an open configuration that allows venting and filtration of the recess defining means (16)(page 8, lines 18-21)(figure 3).

Regarding claim 49, Bar-Shalom teaches a second recess, the small gap between recess defining means (16) and stoma covering means (10, 11, 16). Bar-Shalom also teaches a filter means (page 8, lines 18-21).

Regarding claims 50 and 51, Bar-Shalom teaches removable means (10, 11) for engaging and adhering the recess defining means (16) to tissue (12) surrounding a stoma (13).

Application/Control Number: 10/811,055 Page 6

Art Unit: 3761

Regarding claims 52-56, Bar-Shalom teaches a collapsible concertina-like waste collection means (14) comprising a pouch (see figure 2) having its upper end connected to a securing means (10, 11, 16).

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Michael Bogart whose telephone number is (571) 272-4933.

In the event the examiner is not available, the Examiner's supervisor, Tatyana Zalukaeva may be reached at phone number (571) 272-1115. The fax phone number for the organization where this application or proceeding is assigned is (571) 273-8300 for formal communications. For informal communications, the direct fax to the Examiner is (571) 273-4933.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is (571) 272-3700.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair_direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
